“BE FREE!” follows the world-wide peace event and pilgrimage of the Earth Caravan. The travelers of this 40-day journey bring the Peace Flame from Hiroshima across Japan, through Europe and to the Middle East.

In this film, former Israeli soldiers clearly explain the reasons why wars happen in the world even though people don't want them to. You can learn the history of Auschwitz, how many people were persecuted because of “difference”. Many things, which have been hidden about Palestine and Palestinians are also revealed. Is it true that Palestinian people are terrorists? Is it true that they are fighting religious wars? Through experiencing this film, you can find the answers to these questions and more.

(2016/ Japan/ screening time: 112minutes/ subtitle: English).
